Full Stack Engineer with experience building scalable web applications and backend systems using Go, Node.js, React, and Next.js. Skilled in designing REST APIs, serverless architectures, and real-time systems. Strong focus on performance optimization, clean architecture, and building production-ready software for high-growth environments.

TECHNICAL SKILLS

Languages: C, C++, JavaScript, TypeScript, Go, Python

Frontend: React.js, Next.js, Tailwind CSS, Redux, TanStack Query

Backend: Node.js, Express.js, Flask, Gin (Go)

Cloud & DevOps: AWS (EC2, Lambda, Serverless), Docker, Kubernetes, CI/CD

Database: MySQL, PostgreSQL, MongoDB, DynamoDB

Developer Tools: Git, GitHub, GitLab, Postman, Swagger

EXPERIENCE

NirogGyan | Software Developer | (Oct 2025 – Dec 2025, Remote) | 

- Designed a **serverless report generation system** using Node.js and AWS Lambda for high-volume medical data processing
- Built a **PDF automation pipeline using Puppeteer**, transforming raw JSON data into structured diagnostic reports
- Developed client-facing web pages for **interactive report viewing and downloads**
- Improved backend processing efficiency and scalability for large datasets

Wishfy Technology | Full Stack Developer | (Oct 2023 – Oct 2025)

Wishfy | E-Commerce | 

- Developed a scalable e-commerce platform using **Next.js, TypeScript, and Redux**
- Built **admin panel and user-facing UI** from scratch
- Optimized performance and accessibility, achieving **high SEO scores and faster load times**
- Implemented efficient **data fetching and caching using TanStack Query**
- Collaborated with backend and design teams for seamless feature delivery

BWellAI | AI-generated health metrics | 

- Built the **entire frontend platform from scratch** using React, TypeScript, and TailwindCSS
- Developed an **interactive body mapper** for organ-level health insights
- Integrated **AI-based facial scanning (Shen.AI SDK)** for real-time health metrics (heart rate, oxygen, stress)
- Implemented **barcode scanning (ZXing)** for quick product data retrieval
- Built dynamic dashboards using **Chart.js for real-time visualization**

PERSONAL PROJECTS

LinkArena | Link-in-Bio Platform

- Designed a scalable platform similar to Linktree for public profile sharing
- Built backend using **Go (Gin)** with JWT authentication and secure APIs
- Optimize database design for **high-read traffic use cases**
- Used Docker and PostgreSQL for scalable deployment

Collaborative Drawing App | Excalidraw Clone

- Built a **real-time collaborative whiteboard** using WebSockets
- Designed backend with Node.js and PostgreSQL
- Implemented multi-user synchronization for live drawing events

EventBuster | Event Management Platform 

- Built a multi-role system (User, Organizer, Admin) with role-based access control
- Integrated Stripe payments for secure real-time transactions
- Designed scalable REST APIs (Node.js, Express, MongoDB) for bookings and events
- Implemented JWT authentication + protected routes

EDUCATION

Bachelor of Science (Mathematics)

Prof. Rajendra Singh University, Prayagraj (2024 – 2027)
